

João Gabriel Almeida Flores

Sorocaba, Brazil | (15) 99775-2074 | gabrielalmeidaflores@hotmail.com | LinkedIn | Portfólio

PROFESSIONAL SUMMARY

Software developer specializing in cloud and Linux, with hands-on experience in backend and infrastructure. I work across the lifecycle of multi-tenant applications with C#, TypeScript, and Go: from architecture to CI/CD with Docker/GitHub Actions, including AWS/Azure infrastructure and secure Linux operations. I focus on stability, performance, observability, and continuous delivery, aligning technical decisions with product needs.

PROFESSIONAL EXPERIENCE

Software Developer

Apr 2024 - Present

Ousion - Technology Solutions, Sorocaba, Brazil

- Designed and evolved cloud-native multi-tenant and microservices architecture on AWS/Azure (EC2, Lambda, RDS, S3, DynamoDB), applying Hexagonal, Modular, and Clean Architecture for per-customer isolation and horizontal scale.
- Standardized CI/CD pipelines with GitHub Actions and Docker (including serverless workflows), reducing release friction and improving delivery predictability.
- Hardened Linux operations (security hardening, Nginx, high availability) and introduced observability practices to detect and resolve incidents faster.
- Developed and reviewed code in Go (Gin), C#/.NET (ASP.NET Core), TypeScript/Node.js (Nest.js), Java (Spring Boot), and Python, aligning technical quality with business priorities.
- Diagnosed and resolved production incidents across cloud and Linux environments, reducing recovery time and customer impact.

Mid-level Web Developer

Jan 2024 - Apr 2024

Epiousion - Technology Solutions, Sorocaba, Brazil

- Delivered full-stack features in C#/.NET (ASP.NET Core), Angular, React.js, and Next.js under Scrum/Agile, with secure REST APIs and third-party integrations.
- Optimized queries in SQL Server, PostgreSQL, MySQL, and MongoDB on critical paths, improving response time and stability under load.
- Refactored legacy modules using modular and Clean Architecture approaches, and introduced testing/automation into the team workflow, reducing regressions across releases.
- Implemented and evolved multi-tenant product capabilities, ensuring data isolation and per-customer configuration.

- Implemented business rules in C#/.NET and Angular/JavaScript UIs, plus REST integrations in full-stack applications.
- Fixed bugs and stabilized SQL Server and PostgreSQL queries, improving reliability of the squad's deliveries.
- Actively joined code reviews and the Scrum/Agile cycle, accelerating delivery while matching the team's quality standards.

EDUCATION

Postgraduate Specialization in Software Architecture, Cybersecurity, and Data Science <i>Pontifical Catholic University of Paraná</i>	Jan 2025 - Dec 2026
Technology Degree in Systems Analysis and Development <i>University of Sorocaba</i>	Jan 2022 - Jan 2025

TECHNICAL PROFICIENCIES

Backend	C# / .NET, ASP.NET Core, TypeScript / Node.js, Nest.js, Go, Gin, Java, Spring Boot, Python
Cloud & DevOps	AWS (EC2, Lambda, RDS, S3, DynamoDB), Azure, Docker, CI/CD, GitHub Actions, Linux, Nginx, Serverless, Observability
Architecture & Practices	Microservices, Hexagonal, Modular, Clean Architecture, Cloud-Native, Multi-tenant, High Availability, Security Hardening, Code Review, Scrum / Agile
Databases	PostgreSQL, SQL Server, MySQL, MongoDB, DynamoDB, Query Optimization
Frontend	Angular, React.js, Next.js, JavaScript

CERTIFICATIONS & COURSES

- AWS Certified Solutions Developer - Associate - 2025
- GCP Cloud Digital Leader - 2024
- AWS Certified Solutions Architect - Associate - 2023
- AWS Cloud Practitioner - 2023
- LPI Linux Essentials - Linux Professional Institute - 2022
